

Webdriver-Manager Issue

1. Download and install Python here, <https://www.python.org/ftp/python/3.10.4/python-3.10.4-amd64.exe>
2. Open your Pycharm, File->Settings->Project:xx->Python Interpreter
Click the Setting and select a new interpreter

3. Add the following Python interpreter, Virtualenv Environment. Click OK.

4. Click the Add (+) to install all required packages
